

## Summary election plan Master your own bachelor

Based on these three main points, the Hanze Student Interests Association, HSV, will focus on promoting the interests of the student this year.

### Active student and development

Studying is more than just following your studies and passing your courses. The development of the student is central, while the student can develop in many more areas than just his or her field. The HSV stands for an optimal development of the student, for example by following a board or committee year. We also want to focus on flexible education.

During the corona period, students had to stay in their own rooms too much. The HSV strives for higher attendance at social activities with your class, within the study or sports association. By meeting up with a group and doing fun activities together, the student will feel more comfortable and this will improve the quality of life.

### Social security

Hanze UAS must be a safe and familiar environment for students. Research has shown that student welfare has deteriorated as a result of the corona pandemic, among other things. Hanze UAS must do their part by giving students the opportunity to work on location in a safe environment. The HSV also aims to provide support and hotlines that students can turn to when needed.

### Communication and audibility

When the hotlines exist, which fortunately is already the case in some cases, the student should be aware of this; what is the use of a hotline if nobody knows about its existence? The HSV is in favor of clear visibility of these hotlines, so that communication between the student and the Hanze UAS is optimized!

Many international students receive incomplete information from the Hanze UAS, purely because not all information is made available in English. This is the basis that should be in order, which is not the case at the moment. The international students are not second-class students and need to be actively involved. The HSV wants to change this.

### Other views

#### **Abolish compulsory books.**

Why should you buy books? They are compulsory, but how often do you really use them?

#### **More study places/restructuring of the current capacity.**

Students should be able to use an available workstation at any time/place.

#### **More environmentally friendly work.**

Sustainable and innovative developments must be examined with a critical eye in order to improve the environmental policy of Hanze UAS.

If you have any questions based on these points or would like further clarification, please ask any party member or drop by our office, T1.05!
